

## Vet Help Direct

# Video-calling software linking vets with pets

## Services

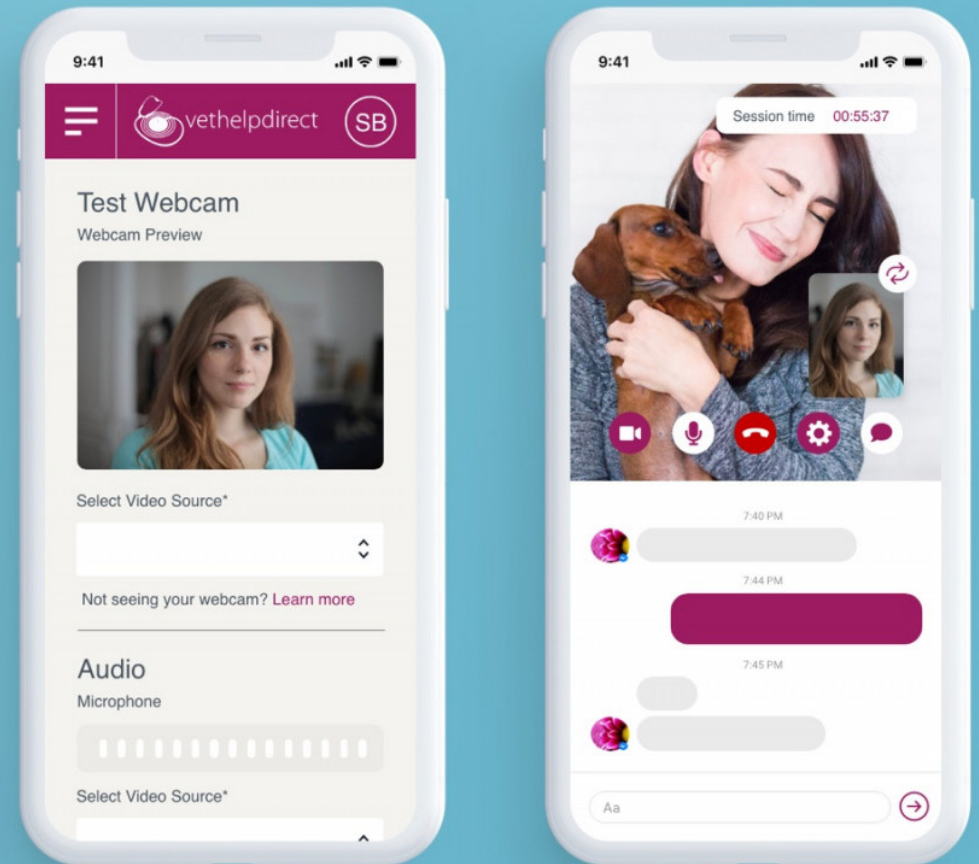

Consultation. Design. **Development.** Maintenance.

## Overview

Building on the success of their leading vet directory and review platform, which attracts over 1.2 million unique visitors each year, the Vet Help Direct Video Consultation Platform acts as another tool to assist vets in making the digital leap.

## Goals

- An industry-changing web application, for pet owners and vet practices, to be able to hold video appointments, quickly and efficiently.
- Pet owners are able to select an appointment, make a payment and, within minutes, be talking to a real vet via their mobile or desktop device.

## Results

- A powerful multi-language platform, designed with user experience in mind at every step.
- Gaining much attention across the industry and beyond, the Vet Help Direct Video Consultation Platform is not only loved by vets, but also by their customers.

## Technical

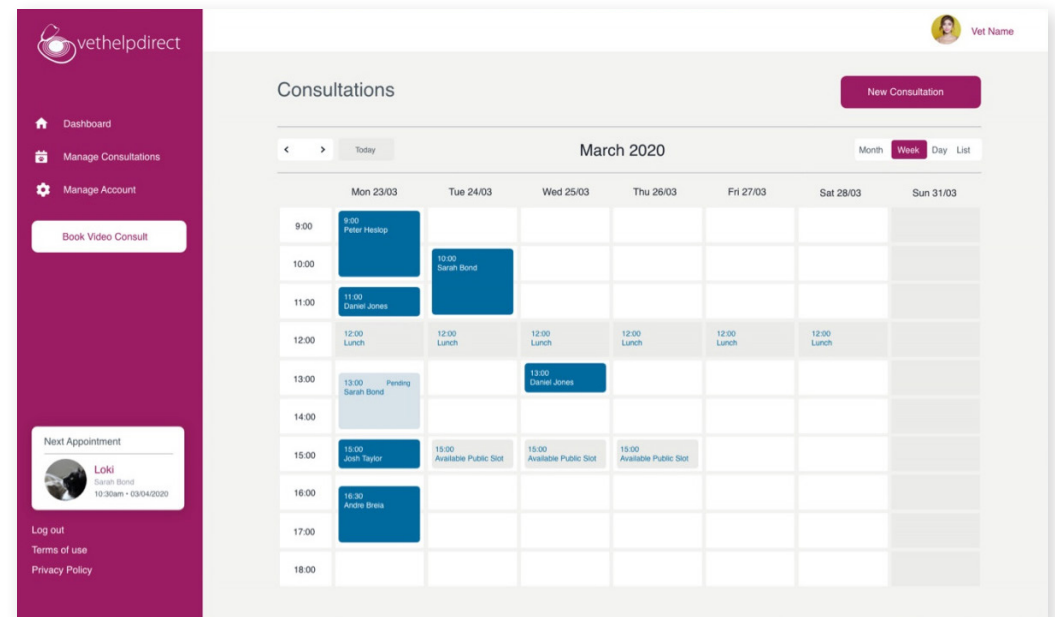

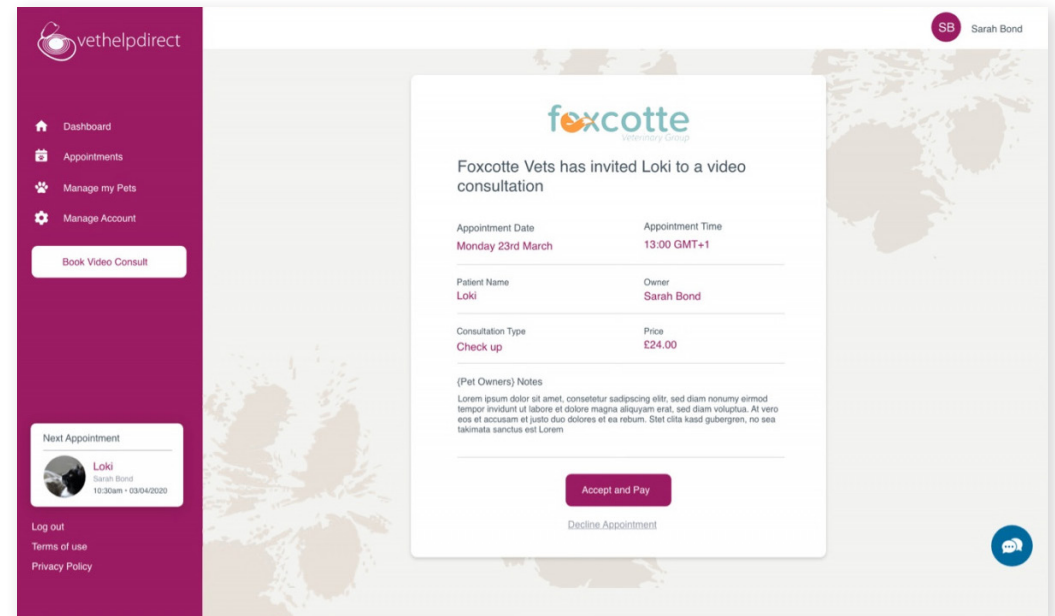

We built a scalable web application with Laravel and Vue.js as the foundations.

We utilised our extensive Stripe experience to build a billing system, capable of distributing revenue and handling multiple tax zones.

Steadfast Collective are very smart developers, with access to excellent web design skills.

They are able to solve complex business-critical issues and provide guidance through the whole process. This is what sets Steadfast apart from others.

Francis Doyle / Business Development Manager
